Abstract:	This deliverable provides the DIONE Data Management Plan, which details the data collected and generated through research and innovation activities and piloting phases, copyright, IPR and the informed consent-forms as well as information sheets handed to the participants of all project participatory activities. As DIONE has opted in for the Open Research Data Pilot, FAIR (Findable Accessible Interoperable Reusable) data policies underpin the usage of data during the course of the project and beyond. The report elaborates on measures and mechanisms regarding the storage, protection sharing and reuse of the data. Moreover, the report explains how the project and its activities are compliant with established EC and national guidelines for the Protection of Personal Data (POPD). The deliverable is considered a living document that will be updated over the course of the project; in particular prior to the mid-term and the final reviews or on-demand, when changes in policies by the EU Commission or the consortium synthesis have occurred or when a new innovation potential (e.g. patent) has been identified.
